1" increments for the best  
ergonomic work  
environment

Easy  
Adjustment

26"

The *Ergo-Workstation* is the ideal assembly or workbench for any industry. This individual workstation is a perfect solution for any assembly line applications, or sub assembly. With the 21" window of movement *up and down* the *Ergo-Workstation* will adjust to virtually any associate, or parts height requirement needed. The *Ergo-workstation* has a *spring-assisted* deck that can easily be moved *up and down*. The Akro-Mils bin-mounting panel is attached to the deck frame, when the deck is adjusted so are your parts. Add the optional light and tool balancers bracket and you have the perfect ergonomic work environment for any application needed.
