Description

Superior design and exceptional construction enable this cart to stand up to the rigors of automated systems, over the road hauling and loading dock handling to ensure reliable service and delivery of your products to their final destination. Avoid serious injury, factory down time, and loss of productivity when you use CannonCarts® in your automated cart handling systems to quickly achieve operational efficiencies. 1/2" diameter solid rear shelf support rod penetrates side frame tubes for extra shelf reinforcement. Additionally the side frames pass into the base frame for added strength. This stainless steel cart features a stainless steel bottom plate below the bottom wire shelf that covers the space between the caster plate and dairy grade casters.

- Dairy Capacity: 80 Gallons/180 1/2 Gallons
