- Installation manuals and video with the product
- An unmatched Quick Ship program

Our Wire Mesh Partitions

Provide A Safe Environment for Your Workers!

Safeguards are essential for protecting workers from preventable injuries. Moving mechanical motion and machine parts have the potential to cause serious workplace injuries. Burns, crushed hands and fingers, amputations, and eye injuries must be prevented. With Matrix Guard, you receive an OSHA compliant safety product.

Wireway Husky Corp., located in Denver, North Carolina (in Charlotte metro area), has been in business since 1964. Our many years of growth and success is due to our policy of . . .

- Selling only through select dealers nationwide
- Offering market short lead times
- Safe, heavy duty and exceptional products

All on-going new research and product development of our wire partitions and accessories are produced in our 240,000 square foot facility.

COMMITMENT

Corporate Commitment Within How committed are we ? 100% !

Wireway Husky Corp. Owners and Executive Team meet weekly to discuss Product Development, New Technology, Marketing & Advertising, Customer feedback and other important topics. This meeting cements our commitment to each and every one of our customers - that the utmost quality of sales and service is available continuously, our products are innovative and remain the safest in the marketplace, and our product research and development continues year to year as top priority.

Technical & Customer Support

Our Clients are covered with our staff of Regional Sales Professionals and Dealer network. Customer support as well as Technical Support is available to guarantee your order is processed quickly and any technical questions you may have are answered promptly. An installation manual is included with product shipment to insure safe and easy setup. Our customer service and administrative staff will follow through from order entry to shipment of your order.

MACHINE GUARDING

Matrix Guard®

Our revolutionary, new design that permits
fast and easy installation for Machine Guarding.

MATRIX GUARD® FEATURES

Hexhead Bolt-on Installation

S T E P 1

2

3

4

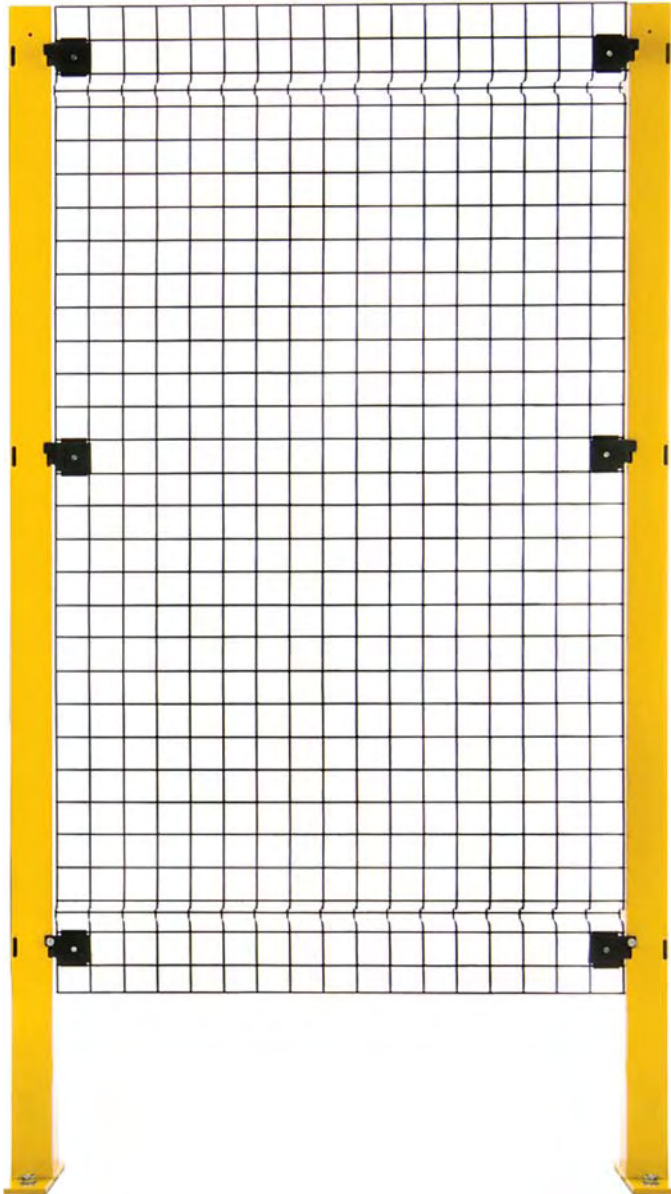

The Bolt-on clip applies to the bottom of the wire mesh panel and post when installing. The Hexhead Bolt is used to secure the panel to the post.

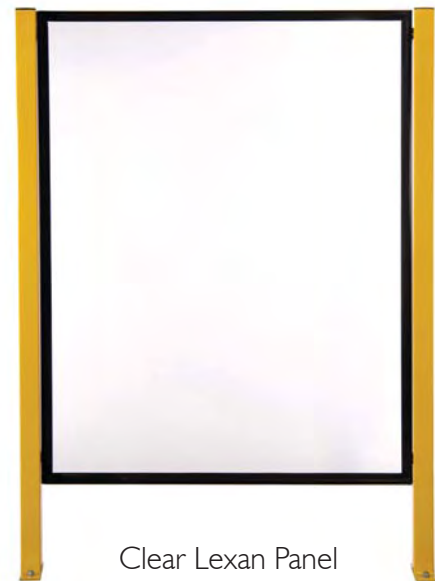

MATRIX GUARD® APPLICATIONS

MATRIX GUARD® PANELS

Solid Sheet Metal Panel

Clear Lexan Panel

Matrix Guard®

Matrix Guard machine guarding enclosures provide exactly the right level of protection necessary to be attractive, versatile, and affordable.

MATRIX GUARD® CLIPS

Our revolutionary, patented hook design makes Matrix Guard so easy. Separate hook fastener on partitioning slips on easily and locks securely into 2-1/2" square post (more secure than any bolt system). The 2" x 2" x 8-gauge welded wire mesh adds extra strength and security.

The complete Matrix Guard system makes it easy to rearrange or expand enclosures without skilled personnel in plant or warehouse areas. With a variety of sizes, styles and options available, Matrix Guard is the best value in the industry.

*At last
there's
a hassle-free,
labor saving way
to assemble wire
guarding . . .*

- ④ Slide Door Assembly - Installed

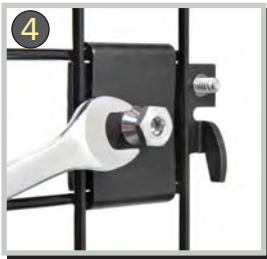

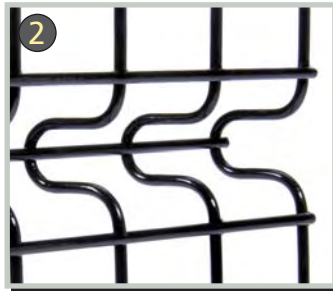

MATRIX GUARD® FEATURES

Incredibly easy to install: Our measured installation times with several major competitors' components show that Matrix Guard installation times are 4 to 5 times faster and therefore less costly.

Strong & Secure: Matrix Guard gets its strength from all-steel construction, its system of anchoring to the floor with 3/8" thick pads, and unparalleled 2.5" square high strength steel tubular posts.

Maintenance-Free: Matrix Guard will look new for years to come due to our high quality polyurethane paint coating.

- 1 Bolt-On Clip Fastener with Hexhead Nut
- 2 Reinforcing Flute in panels
- 3 Post with Top Cap
- 4 Breakaway Nut with wrench (before) after installation tighten until breakaway nut detaches
- 5 Inside enclosure Right Hook Clip without breakaway nut (after)
- 6 Outside enclosure Right Hook Clip
- 7 Tamper proof backplate (kit included) For more kits order separately.

Matrix Guard®

Guarding is available for Quick Ship in either 6 ft. or 7 ft. panel heights. Custom heights are available. Contact Wireway Husky Corp. for free engineering assistance.

● **PANELS**

Stock panels are manufactured to accommodate 6 ft. and 7 ft. high. The panels for 7 ft. high are installed stacking one panel over another using special welded connectors on each panel. Each panel has "connectors" to the vertical framing members which engage slots punched in the line posts.

● **WIRE MESH**

Wire mesh is made of 2" x 2" x 8-gauge welded wire mesh.

● **SWEEP SPACE**

There is a sweep space between the bottom of panel and floor level in either 12", 6" or flush to the floor.

● **FINISH**

Panels, doors and line posts are painted with one coat of high quality polyurethane paint. Some hardware items may be zinc plated.

● **HARDWARE**

Necessary hardware including masonry lag bolts required for installation are included.

● **LINE POSTS**

2-1/2" square heavy duty tubular posts are universally punched with slots and holes for mounting all types of panels, doors and hardware.

● **CORNER POSTS**

The length of the post will equal the overall height of the assembled partitions. Slots are punched in the corner posts to provide boltless panel installation. Other holes are provided for use with doors which are attached using self threading screws. Posts have pads welded to one end for attachment to the floor.

● **DOOR CONSTRUCTION**

Doors are constructed of 2" x 2" x 8-gauge to match the wire mesh panels. Each single sliding door has (two) four wheel adjustable trolleys traveling in an enclosed overhead track. The door bottom is guided by a U-shaped floor guide.

Each hinged door has 3 fixed butt hinges and a jam bar.

● **LOCKS**

Each door is shipped with a bronze cylinder lock. The lock contains a 5-pin cylinder (1" standard) which may be master-keyed and keyed alike.

A padlock attachment is also available.

Contact Wireway Husky Corp. for other lock options.

● **EXTRA HIGH SYSTEMS**

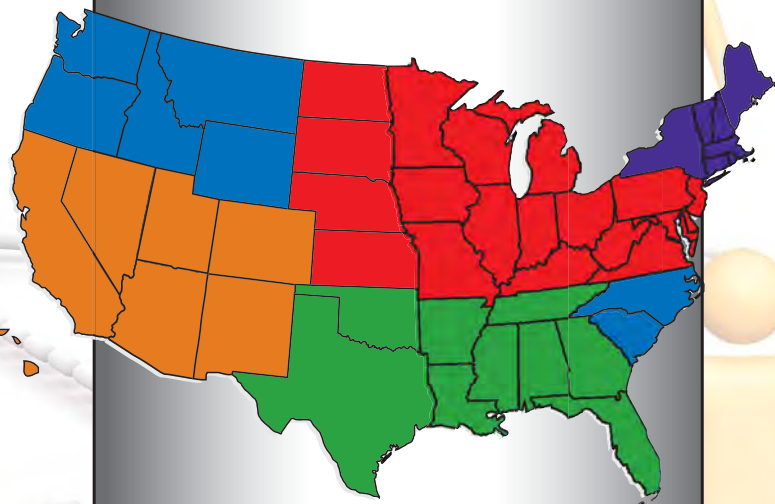

Wireway Husky Corp. has developed a standard system for extra high systems using easy-to-handle standard 10 foot sections of posts, spliced in the field using only a wrench.

One Year Limited Warranty

Wireway Husky Corp. partitions, doors, windows, and associated hardware are warranted to the original purchaser against defects in workmanship and materials for a period of one year from purchase date. During the warranty period Wireway Husky Corp. will, at its option, repair or replace any defective part provided all terms and conditions set forth herein are adhered to. Wireway Husky Corp. will also pay freight charges to and from the Wireway Husky Corp. factory. The warranty is void if the product has been damaged because of improper installation, neglect, accident, misuse, improper storage, or modification by anyone other than authorized Wireway Husky Corp. management. Wireway Husky Corp. shall not be liable for consequential or incidental damages. Wireway Husky Corp. makes no other warranties expressed or implied. Product specifications and pricing subject to change without notice. Refer to website for up to date data.
